

Mounting frame, BCR-S Mini G2

Accessories

The card reader BCR-S Mini G2 is best suited for wall mounting. A mounting frame is recommended if the mounting surface is uneven. The mounting frame can also be used as a distance for external mounting.

Art nr: 44280280 Mounting frame BCR-S Mini G2

Performance

The BCR-SD G2 is best suited for wall mounting. If the mounting surface is uneven, it is recommended that a mounting frame is being used.

The mounting frame can also be used as a distance for external mounting where cables are pulled forward to the card reader.

The frame also fills an important function if the card reader is mounted where it can be exposed to rain. The rain then flows behind the card reader instead of over it.

Installation

Begin by attaching the mounting frame with appropriate screws, and then proceed to mount the card reader on the mounting plate according to the standard procedure.
