

# Vandal protection with display protection xCR-SD G2

## Accessories

When a BCR-SD G2 or SCR-SD G2 card reader is installed in a challenging environment where vandalism or hard and heavy objects may hit the reader, a Vandal Protection frame with Display protection cover can be used. The frame and display cover absorbs and redirect the forces and protects the card reader from damage.

**Art nr:** 44280291 Vandal protection with display protection xCR-SD G2

**Compliant with:** 44280292 Installation plate for Vandal Protection xCR-SD G2

## Performance

With a frame made in sturdy polyamid PA66 plastic with the same color as the front of the card reader, this makes a stylish installation. The transparent display protection cover is made in UV resistant Polycarbonate, Makrolon AR, a material with excellent impact resistance.

The vandal protection redirect and absorbs power from side and front blows and protects the reader from tampering and vandalism. The exchangeable display protection cover protects the card reader display from damage and scratches from scarp edges. With the smooth surface and sloped frame of the vandal protection, it is difficult to use the reader as a climbing step

An installation plate is strongly recommended when the card reader is installed on a metal surface to minimize problems with low reading distance caused by interference from a metal surface.
