

App-free Native Wallet Mobile Access

No apps. No plastic. No lock-ins.

- **Open by Design**
No vendor lock-in
- **Enterprise Security**
GDPR compliant, EU-hosted
- **Seamless User Experience**
Just tap and go
- **Access You Can Rely On**
Built on 25+ years of access control expertise

From Signup to First Tap in Minutes

PassGate makes mobile access as easy as paying with your phone. Credentials are delivered straight to the native wallet of the phone – secured by biometrics and hardware-level encryption.

Remote Provisioning – Issue passes anywhere

How it Works

Create

Enter user details

Send

Secure invite to user's inbox

Add

User adds pass to wallet with 2FA

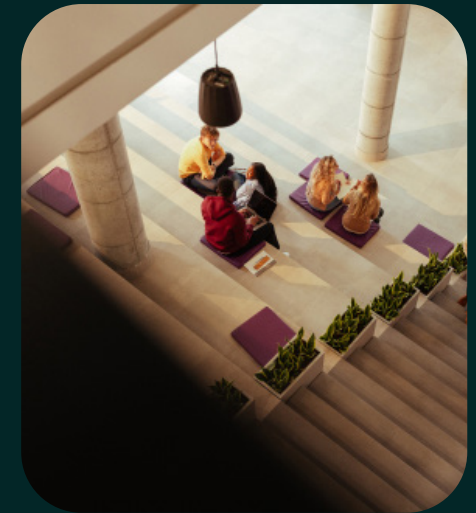

Use

Tap phone or watch at any reader

Designed for Large & Complex Security Environments

- **OEMs**
Integrate wallet credentials via open APIs & SDKs.
- **Universities**
Replace thousands of plastic cards with sustainable, user-friendly digital passes.
- **Corporations**
Scale enterprise mobile access with full compliance.

Access That Adapts in Real Time

- Update, revoke or pause credentials instantly.
- Short-term visitors, contractors, or long-term staff.

Why Choose PassGate?

Openness

Vendor independent, integrate with API

Streamlined Operations

Simplified management, lower costs

Stronger Security

Biometrics & hardware encryption

Sustainability

No plastic cards, printers, or waste

Want to See the Benefits of Native Mobile Access in Your Organisation?
